ELSEVIER

Reliability Engineering and System Safety 63 (1999) 295–296

RELIABILITY ENGINEERING & SYSTEM SAFETY

Contents of Volume 63

Number 1

1 Reduction of the Markovian system by the influence graph method: error bound and reliability computation
B. TOMBUYSES (Belgium)

13 Reliability analysis for dynamic configurations of systems with three failure modes
H. PHAM (USA)

25 The Demon–Angel method in systematic safety assessment
A. G. VASSAKIS (Greece)

33 On the quantification of the effects of organizational and management factors in chemical installations
I. A. PAPAZOGLOU & O. ANEZIRIS (Greece)

47 The potential for a generic approach to certification of safety critical systems in the transportation sector
Y. PAPADOPOULOS & J. A. McDERMID (UK)

67 A point-process stochastic model for software reliability
M. S. FINKELSTEIN (Russia)

73 The Event Sequence Diagram framework for dynamic Probabilistic Risk Assessment
S. SWAMINATHAN & C. SMIDTS (USA)

91 Diversity in computerized reactor protection systems
H. D. FISCHER & L. PIEL (Germany)

Technical Notes

99 A toolkit for parametric drift modelling of electronic components
J. A. JONES (UK)

107 An optimal geometric process model for a cold standby repairable system
Y. L. ZHANG (People's Republic of China)

Number 2

111 Fault tree developed by an object-based method improves requirements specification for safety-related systems
M. ČEPIN & B. MAVKO (Slovenia)

127 An optimal inspection strategy for randomly failing equipment
A. CHELBI & D. AIT-KADI (Canada)

133 Availability and cost functions for periodically inspected preventively maintained units
J.K. VAURIO (Finland)

0951-8320/99/$ - see front matter

141 Generic probabilistic safety analysis: application to the comparison of the emergency feedwater system designs of three PWRs and to the modernisation and backfitting of older Swedish NPPs
L. CARLSSON (France), H. ERIKSON (Sweden) & W. WERNER (Germany)

155 The impact of the operating environment on the design of redundant configurations
M. MARSEGUERRA, E. PADOVANI & E. ZIO (Italy)

161 Simultaneous determination of preventive maintenance and replacement policies in a queue-like production system with minimal repair
L.-F. HSU (USA)

169 A multimedia, multiple pathway exposure assessment of atrazine: fate, transport and uncertainty analysis
C. LIU, D.H. BENNETT, W.E. KASTENBERG, T.E. McKONE & D. BROWNE (USA)

185 A multimedia, multiple pathway risk assessment of atrazine: the impact of age differentiated exposure including joint uncertainty and variability
D.H. BENNETT, W.E. KASTENBERG & T.E. McKONE (USA)

199 Assessment of human reliability based on evaluation of plant experience: requirements and implementation
O. STRÄTER & H. BUBB (Germany)

Number 3

Special Issue—Developments in Risk Informed Decision Making for Nuclear Power Plants

223 Editorial: Developments in risk-informed decision-making for nuclear power plants
W. E. VESELY & G. E. APOSTOLAKIS (USA)

225 Optimized work control process to improve safety and reliability in a risk-based and deregulated environment
J. G. ANDERSON, J. D. E. JEFFRIES, T. P. MAIRS & F. J. RAHN (USA)

231 An approach for using risk assessment in risk-informed decisions on plant-specific changes to the licensing basis
M. A. CARUSO, M. C. CHEOK, M. A. CUNNINGHAM, G. M. HOLAHAN, T. L. KING, G. W. PARRY, A. M. RAMEY-SMITH, M. P. RUBIN & A. C. THADANI (USA)

243 Probabilistic safety assessment support for the maintenance rule at Duke Power Company
H. D. BREWER & K. S. CANADY (USA)

251 Challenges in using a probabilistic safety assessment in a risk informed process (illustrated using risk informed inservice inspection)
J. R. CHAPMAN & V. B. DIMITRIJEVIC (USA)

257 Conceptual containment venting strategy for Susquehanna steam electric station
E. R. JEBSEN (USA)

267 The impact of assessing lower head integrity on boiling water reactor probabilistic risk assessments
C. A. KUKIELKA (USA)

275 Win-win initiatives
H. SPECTER (USA)

283 Principles of resource-effectiveness and regulatory-effectiveness for risk-informed applications: Reducing burdens by improving effectiveness
W. E. VESELY (USA)

295 Contents of Volume 63
